Vinícius Beloni

Software Engineer & Tech Lead | AI & LLM | Fintech

Salto de Pirapora, São Paulo, Brazil · +55 11 97301-1843 · vinibelonicubas@gmail.com · linkedin.com/in/vinibeloni

Summary

Software engineer with 10+ years building production backend systems, 7+ in fintech, and a track record of leading engineering teams. Currently focused on leading LLM integrations and AI-powered workflows. Led payment platforms processing R$250M/month in TPV and, more recently, a Generative AI product that replaced a manual process for large clients. Also built Claude Code skills and agents adopted by nearly the entire development team.

Skills

- **AI & LLMs:** Generative AI, LLM Integration, AI Agents, Multi-Agent Systems, Amazon Bedrock, Anthropic API, Claude Code
- **Leadership:** Team Leadership, Cross-team Technical Guidance, Architecture Standards
- **Languages & Backend:** TypeScript, JavaScript, C#, T-SQL, Node.js, NestJS, .NET, REST APIs
- **Architecture:** Serverless, Distributed Systems, Microservices, Event-Driven Architecture
- **Cloud, Data & CI/CD:** AWS, PostgreSQL, SQL Server, Amazon SQS, GitHub Actions, Datadog
- **Engineering Practices:** Spec-Driven Development, Integration Testing, E2E Testing, Test Automation
- **Fintech:** Payments, Pix, Credit, Receivables Settlement, Reconciliation, Banking Integrations, White-label APIs

Experience

Tech Lead — Niuco

Feb 2025 – Nov 2026 · Remote

- Led a Generative AI product built with Amazon Bedrock and specialized agents, replacing a manual review process for large clients (1,700 contracts at launch for a key account).
- Built ~10 Claude Code skills and agents (bug fixing, automated deploys, code review), adopted by nearly the entire development team; also built the skill and guided the architecture of a multi-agent workflow on GitHub Actions that automatically fixes simple bugs.
- Built the end-to-end Active Directory integration for the identity governance (IGA) platform, with a security-first design.
- My team had the fewest bugs of all squads and went 17+ weeks without incidents.

Senior Software Engineer — Nuvemshop

Jul 2023 – Feb 2025 · São Paulo, Brazil

- Built the credit platform for Brazil from the ground up with the team, reaching a R$6M+ loan portfolio.
- Implemented Datadog observability to track the lifecycle of credit operations.

Tech Lead — Stone (Cappta)

Dec 2019 – Jun 2023 · São Paulo, Brazil

- Led a team of 4 engineers on the private-label payments platform, processing R$250M+ in monthly TPV.
- Owned the receivables settlement platform, handling R$100k/day in payments.
- Drove integrations with Pix and receivables registrars.

Software Engineer — Stone (Cappta)

Mar 2018 – Dec 2019

- Lead developer on the TEF and POS transactional systems team, serving 9k+ active clients, including LATAM Airlines and Prodata (CPTM train station kiosks).

Developer — Stone Pagamentos · Oct 2017 – Mar 2018 · Backend projects; the team was later integrated into Cappta.

Software Development Intern — Allmatech · Feb 2016 – Oct 2017 · Property management system with integrations to OLX, Mercado Livre, ZAP and Viva Real.

Education

Technical Degree in Information Technology — Etec Fernando Prestes, Sorocaba · 2015–2016
